SUMMARY

I am a Product Designer with over 10 years of experience, specializing in leading end-to-end design processes to deliver user-centric solutions in the health-tech and fintech sectors. I have a proven track record of designing platforms that drive scale, foster user trust, and deliver life-changing medical and financial impact. Highlights of my career include:

- Leading the UI/UX design and interoperability improvements of HeliumOS, a cloud-based EMR system, which facilitated expansion into Middle Eastern markets and increased revenue by over \$1 million.
- Designing critical public health and patient care solutions, including a COVID-19 management platform for the Lagos State Government that safely processed over 500,000 travelers.
- Developing Helium Mum, a maternal healthcare risk stratification tool designed to identify high-risk pregnancies and reduce maternal mortality.
- Automating loan decision processes for healthcare facilities, leading to \$2.13 million disbursed in 18 months to help medical providers purchase essential supplies and upgrade equipment.
- Adept at user research, wireframing, prototyping, and cross-functional collaboration within agile environments to ensure seamless product development.

I thrive in collaborative environments and bring strong leadership, communication, and problem-solving skills to every project. My passion lies in leveraging design thinking to solve complex, real-world problems and build scalable healthcare and financial products that improve lives and drive business growth

EMPLOYMENT HISTORY & EXPERIENCE

Product Design Lead – Tida Retail Limited – Remote

Jan 2025 - Present

- **Spearheading the end-to-end design strategy and execution** for Tida Retail's SmartPOS platform, transforming complex inventory and credit management into intuitive mobile experiences for Nigerian SMEs.
- **Led the hands-on design and launch of the MVP SmartPOS platform**, prioritizing an offline-first UX and seamless hardware integration for tablets and Bluetooth scanners.
- **Architected integrated user journeys** for strategic partnerships with Moniepoint and Alerzo, ensuring a cohesive and trustworthy experience across payment and inventory restocking flows.
- **Designed the user interface and logic for a BNPL financing model** in collaboration with Mkobo, enabling zero-upfront hardware adoption through simplified credit application workflows.
- **Utilized high-fidelity prototyping and design storytelling** to effectively communicate product vision to investors, directly contributing to raising **\$30,000 in seed capital**.
- **Established the design-to-engineering handoff framework** while hiring and mentoring the first product team members to ensure high-quality execution and consistency across the platform.
- **Collaborating at an executive level** to align design initiatives with long-term business goals, financial planning, and operational scalability.

Senior Product Designer – Helium Health – Remote

June 2021 – Jan 2025

Responsible for the end-to-end design process, leveraging product thinking, systems thinking, interaction design, visual design, and prototyping skills to deliver world-class experiences within schedule. Gather requirements from stakeholders. Create research plans, conduct user interviews, and perform qualitative usability testing. Diagram workflows, design sketches, wireframes, and prototypes. Collaborate with agile software development teams. Present user insights to stakeholders.

- Led the design of the loan decision product at Helium Health, automating and improving decision-making and management processes, which facilitated the disbursement of \$2.13 million in loans to healthcare facilities in the first 18 months of operation.

- Led the hands-on design of Helium OS improvements and interoperability, enabling Helium Health's expansion into Middle Eastern markets and resulting in a revenue increase of more than \$1 million as of the first half of 2023.
- Designed a custom solution that supported the Lagos State Government in managing its COVID-19 response, enabling over 500,000 travelers to enter the country safely.

Senior UX Designer – Interswitch Group - Remote

May 2022 - Feb 2024

Provided UX design consulting services to clients, leading product design projects from inception to launch. Managed a team of secondary designers assigned to projects I led. Actively participated in Research and Development (R&D) to keep the team updated with emerging and latest technologies. Gathered requirements from stakeholders, created research plans, conducted user interviews, and performed qualitative usability testing. Designed sketches, wireframes, and prototypes.

- Leading the design delivery for personal banking mobile applications, collaborating with esteemed institutions such as Money Master, First Bank of Nigeria, Signature Bank, and others. Catering to an extensive user base of over 20 million, facilitating over 100,000,000 transactions monthly.

Product Design Lead – Mkobo Microfinance Bank - Hybrid

March 2020 - August 2022

Managed the product design process and the output of all products and brand touchpoints. Oversaw and direct the output of a team consisting of 2 product designers and 1 brand designer. Gathered requirements from stakeholders, created research plans, conducted user interviews, and performed qualitative usability testing. Designed sketches, wireframes, and prototypes, collaborating with agile software development teams and presenting user insights to stakeholders.

- Led a comprehensive brand revitalization process, which was an unequivocal success, contributing significantly to Mkobo's growth and strengthening its market positioning.
- Designed a digital bank that garnered a user base of more than 20,000 individuals, processing over 5,000 transactions daily just one year after its release.
- Improved the retention rate from below 10% to 84% by reducing the time required for user onboarding, designing a gamification system that rewards users for updating personal information, and introducing new engagement features

UX Designer – Gokada Rides Limited - Hybrid

July 2019 - March 2020

Created research plans, conducted user interviews, and performed qualitative usability testing. Designed sketches, wireframes, and prototypes. Collaborated with agile software development teams and worked closely with the data analysis team to analyze user behaviors, making data-informed decisions when redesigning or improving features.

- Designed solutions that transformed the pilot recruitment process into a 90% digital process, reducing pilot onboarding from 14 days to just 3 days.

Brand Designer – Boomplay Music - Onsite

February 2017 - July 2019

Developed visual concepts and designs that aligned with a brand's identity and met the needs of the marketing team. Created artwork, including logos, packaging, and promotional materials. Presented design concepts to clients and stakeholders for review and feedback. Managed multiple design projects simultaneously while meeting deadlines. Actively participated in team meetings, providing valuable input on design-related topics and projects. Also, created animations for marketing promotions and performed video editing for marketing materials.

- I designed a new brand identity for a name change from Boomplayer to Boomplay.
- Additionally, my designed marketing creatives contributed to an increase in social media following from 400,000 to over 1 million followers within 8 months in 2017.
- Furthermore, my marketing creatives played a significant role in increasing app downloads from 1 million to 5 million downloads, resulting in a 67% increase in monthly active users during my tenure.

Graphic Designer – TRW Consult - Onsite

July 2016 - December 2016

Design creatives for book cover, social media and traditional marketing media.

SKILLS

Wireframing, interactive prototyping, user journey mapping, screen flow design, high-fidelity mockups, design system creation, motion graphics, UX copywriting, user research, data analysis, stakeholder collaboration, team mentoring, design trends analysis, competitive landscape analysis, Figma, Figjam, Adobe Suite, responsive design, Lean processes, Agile processes, JIRA, design workshops, ideation sessions, native mobile design (Android & iOS), web application design, B2C design, communication skills, problem-solving, attention to detail, user-centered design, design system leadership, pattern libraries, material design, process flows, product specification documentation, user feedback integration, development collaboration, product goal alignment. **Programming Technologies;** HTML, CSS, Javascript, PHP.

PROJECTS/PRODUCTS EXPERIENCE

1. Tida Retail: [Website](#) - [Web App](#)

Tida Retail Limited is a smart retail technology company transforming how small and medium-sized businesses in Africa sell, manage inventory, and access financial services. Tida Retail provides affordable Point-of-Sale hardware and cloud-based software that seamlessly integrates payments, inventory tracking, supplier ordering, and business analytics—helping merchants save time, reduce costs, and grow profits. From grocery shops to pharmacies, fashion stores to restaurants, Tida Retail delivers solutions built for the realities of African businesses—offline-first, mobile-ready, and locally integrated with partners.

2. MKOBO Bank: [Website](#) - [Google Play Link](#) - [App Store](#)

It is a Nigerian digital microfinance bank focused on financial inclusion. It offers user-friendly, tech-driven services like savings accounts, loans, and money transfers through its mobile app, targeting the unbanked and underbanked. Mkobo aims to empower customers with affordable, secure, and accessible financial solutions. Mkobo Bank emphasizes convenience, affordability, and security, making it a key player in Nigeria's fintech and digital banking space.

see case studies: - [Mkobo Mobile Bank](#)

3. Money Master: [Google Play](#) - [App Store](#)

It is a mobile application designed to simplify financial transactions and money management. It offers features like bill payments, airtime purchases, money transfers, and savings tracking, all in one platform. The app focuses on providing a seamless, secure, and user-friendly experience, catering to individuals and small businesses. Gkala aims to enhance financial convenience and accessibility for underserved users.

see case studies: - [Gkala Mobile App](#)

4. Helium Credit: [Heliumhealth.com/helium-credit/](https://heliumhealth.com/helium-credit/)

It is a digital lending platform that provides quick and accessible loans to healthcare facilities. It leverages technology to offer a seamless application process, instant approvals, and fast disbursements. HeliumCredit enables healthcare providers to access the funds they need to purchase critical medical supplies, upgrade equipment, and expand to new locations, thereby improving patient care.

5. HeliumOS: [Heliumhealth.com/helium-os/](https://heliumhealth.com/helium-os/)

HeliumOS enables end-to-end digitization of electronic medical records, hospital operations, billing, financing, pharmacy, laboratories, and efficient planning for any size and specialty. Digitizing healthcare facilities with HeliumOS enables healthcare professionals to keep a pulse on critical patient information needed to deliver quality care outcomes.

see case studies: - [Carbon Design System](#) - [Patient Care Delivery](#)

6. Helium Mum: [Heliummum.com](https://heliummum.com)

It is a risk stratification tool designed to enhance maternal healthcare by providing digital antenatal records, risk assessments, and appointment reminders. The platform uses a structured questionnaire and an "ASK Score" system to identify high-risk pregnancies early. It aimed to improve patient-doctor engagement while reducing chances of

maternal deaths. Post-launch iterations included postpartum support and analytics for hospitals, ensuring a scalable and impactful maternal health solution.

see case study: [Improving Antenatal Care in Africa](#)

7. **FBN Quest/Edge:** [App Store](#) - [Google Play](#)

It is an investment banking and asset management subsidiary of First Bank of Nigeria. It offers a wide range of financial services, including wealth management, investment banking, capital markets, and advisory services. FBNQuest caters to individuals, corporations, and institutional clients, providing tailored solutions to help them achieve their financial goals. The platform focuses on delivering expertise, innovation, and strategic insights to drive growth and maximize value for its clients. It is a key player in Nigeria's financial services sector, bridging the gap between traditional banking and investment solutions.
