

Mkobo Bank is a digital banking solution tailored for economically active Nigerians and salaried individuals.

Why was Mkobobank Built?

Within the Nigerian banking sector's substantial \$9 billion value pools, a significant challenge persists – **A vast majority of consumers remain underserved.** Despite intense competition, issues like limited access in rural areas, affordability barriers, and subpar user experiences compound customer frustrations across the board, as highlighted by McKinsey & Company.

To drive Nigerian banking sector growth and address these challenges, Mkoobo Microfinance Bank embarked on a mission to **Transform its operation and customer access to digital first by building a digital bank for economically active and salary earners.**

My Role and Responsibility

Management: Lead & manage the design team

Product Discovery and Strategy for MkoboBank

Creating & Managing Mkobo MFB design system

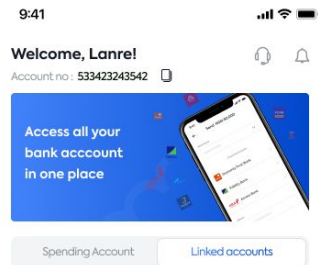

Rebrand Mkobo Microfinance Bank

Product Design for MkoboBank MVP

Rebranding for Consistency & Usability

Designing Mkobo Bank

- ✓ See all your bank account balance at a glance
- ✓ Access all bank transactions with a few clicks
- ✓ Get an accurate overview of your cash net worth
- ✓ Link your first account for free. Subsequent transactions will cost N150

Link Bank Account

Hi [Firstname],

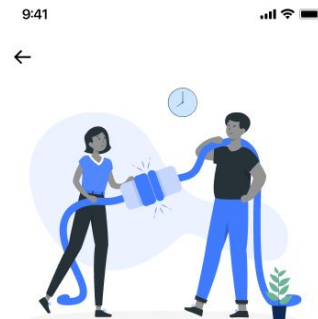

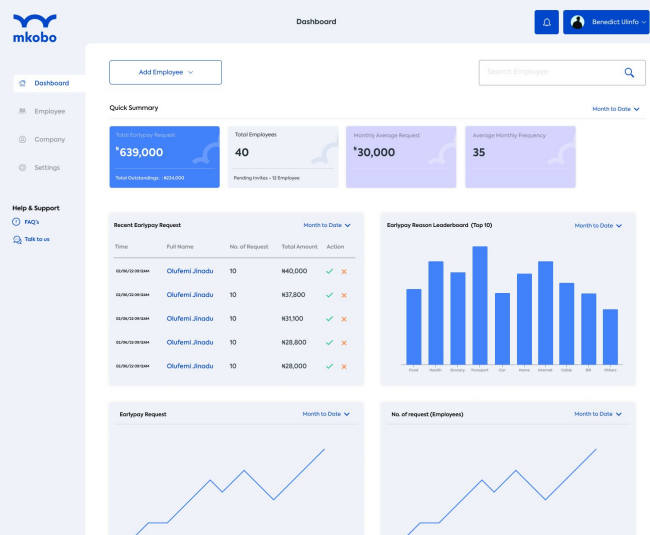

Welcome to Mkobo, where every kobo counts.

Congratulations, you are a step closer to gaining control of your finances. Mkobo was created with one mission - to help economically active Nigerians to better manage their finances and improve their financial wellbeing.

Your Mkobo account number is [account number] and you can start using your account right away.

First, Upgrade your account in two easy steps so as to enjoy the endless possibilities Mkobo offers:

- Take a selfie
- Verify your identity using one of the following NIN, Voters

Connect Bank Accounts

You are about to link your account with mkobobank, the first is free but subsequently, you'll be charged N150 for this transaction.

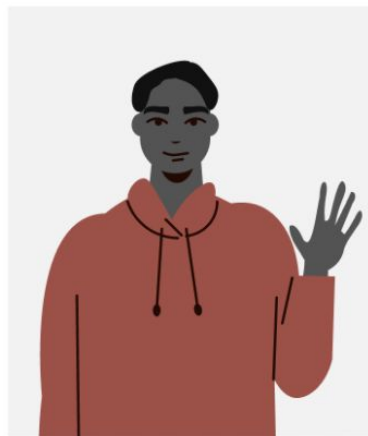

Note: This does not give us access to your account.

Proceed

Product Discovery and Strategy for MkoboBank

In order to understand and develop mkobo Bank uniqueness in the market, we conducted competitive analysis and User Research. This helped us achieved the following

- Understand our primary customer
- Develop & document product requirements
- Develop our primary USP
- Develop User Personas

Adeola Gbadamosi

29, Security Personnel

📍 Lagos

"I was born in Osun state and moved to Lagos when I was 27 for a better life, I'm married with 2 kids and would like to be able to provide for them uninterruptedly"

Designing Mkobo Bank

Background

Ethnicity: Yoruba

Nationality: Nigerian

Age: 29

Gender: Male

Employed or Self-employed

Quantitative Research

The objective is to:

1. **Test value proposition clarity** - Assess understanding of mobile banking application
2. **Evaluate Market Appetite** - Understand comprehension and preference for savings.
3. Evaluate Users interest in an **Earned wage Access** feature
4. Evaluate user appetite for aggregated bank balance

84%

Have a used
mobile banking
application

92%

Have visited a bank
branch to activate
internet/mobile
banking

87%

Don't have access to
reliable credit facilities

70%

Had more than 2
Bank accounts

87%

Save daily via the local
method called "Ajo"

Quantitative Research

The objective is to:

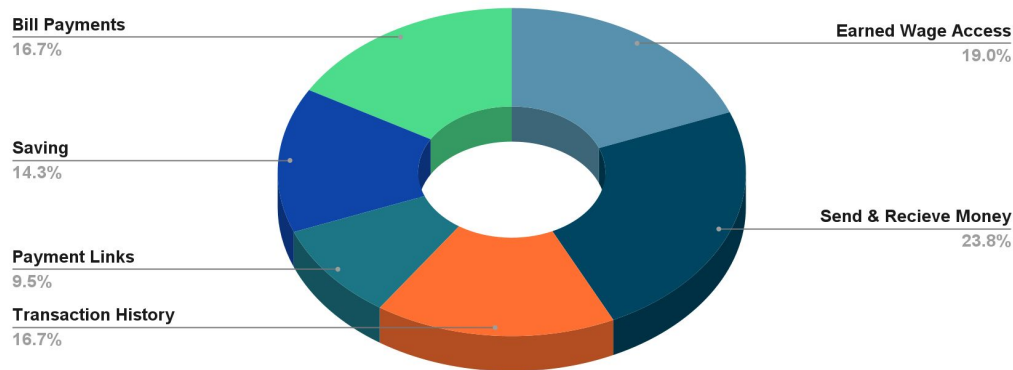

1. **Validate product direction** - Determine what features to design for
2. **Prioritize features** - Determine which elements to build first based on customer response

84%

Priorities Trust and reliability over features and interest rate

Priorities Fund Safety

Defining MkoboBank MVP offerings

Speed to market vs feature completeness

Must Have

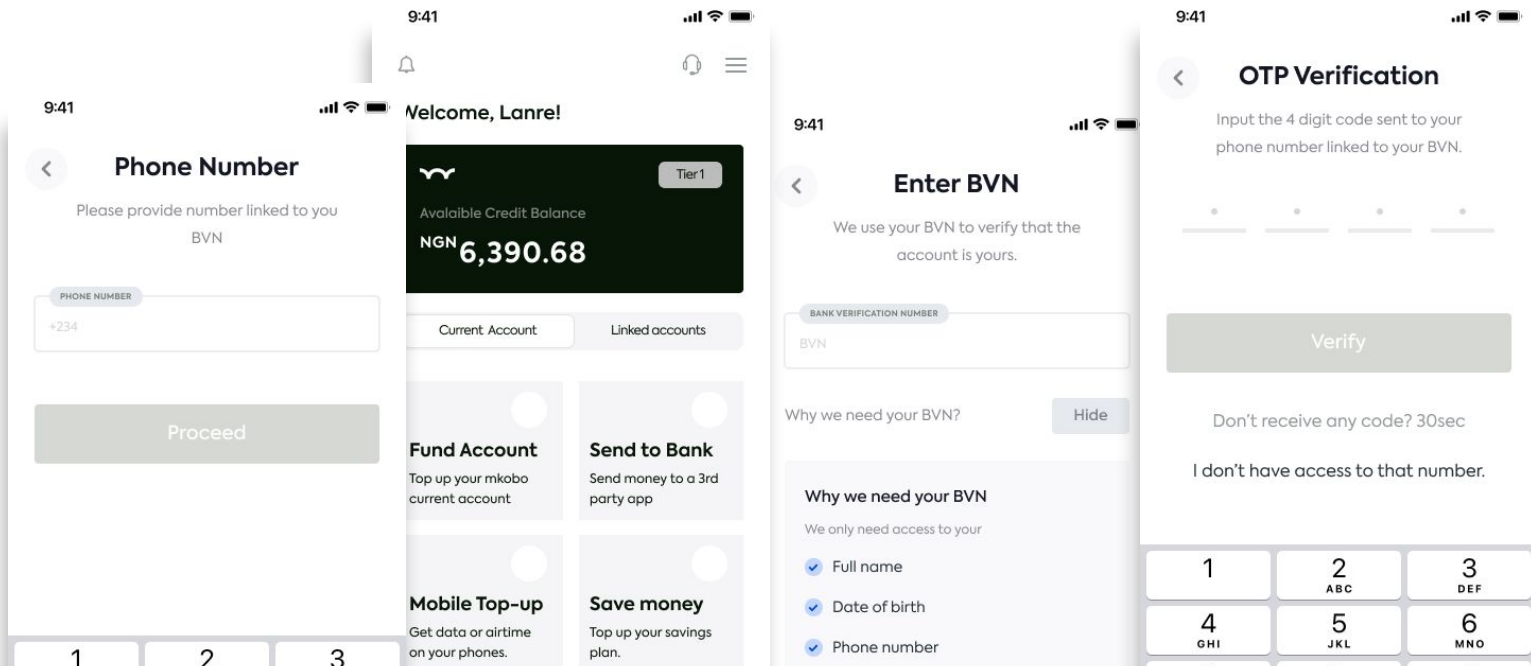

Account Opening | New and Existing
User Onboarding | Send & Receive
Money | Earned Wage Access |
Transaction History | KYC

Nice to Have

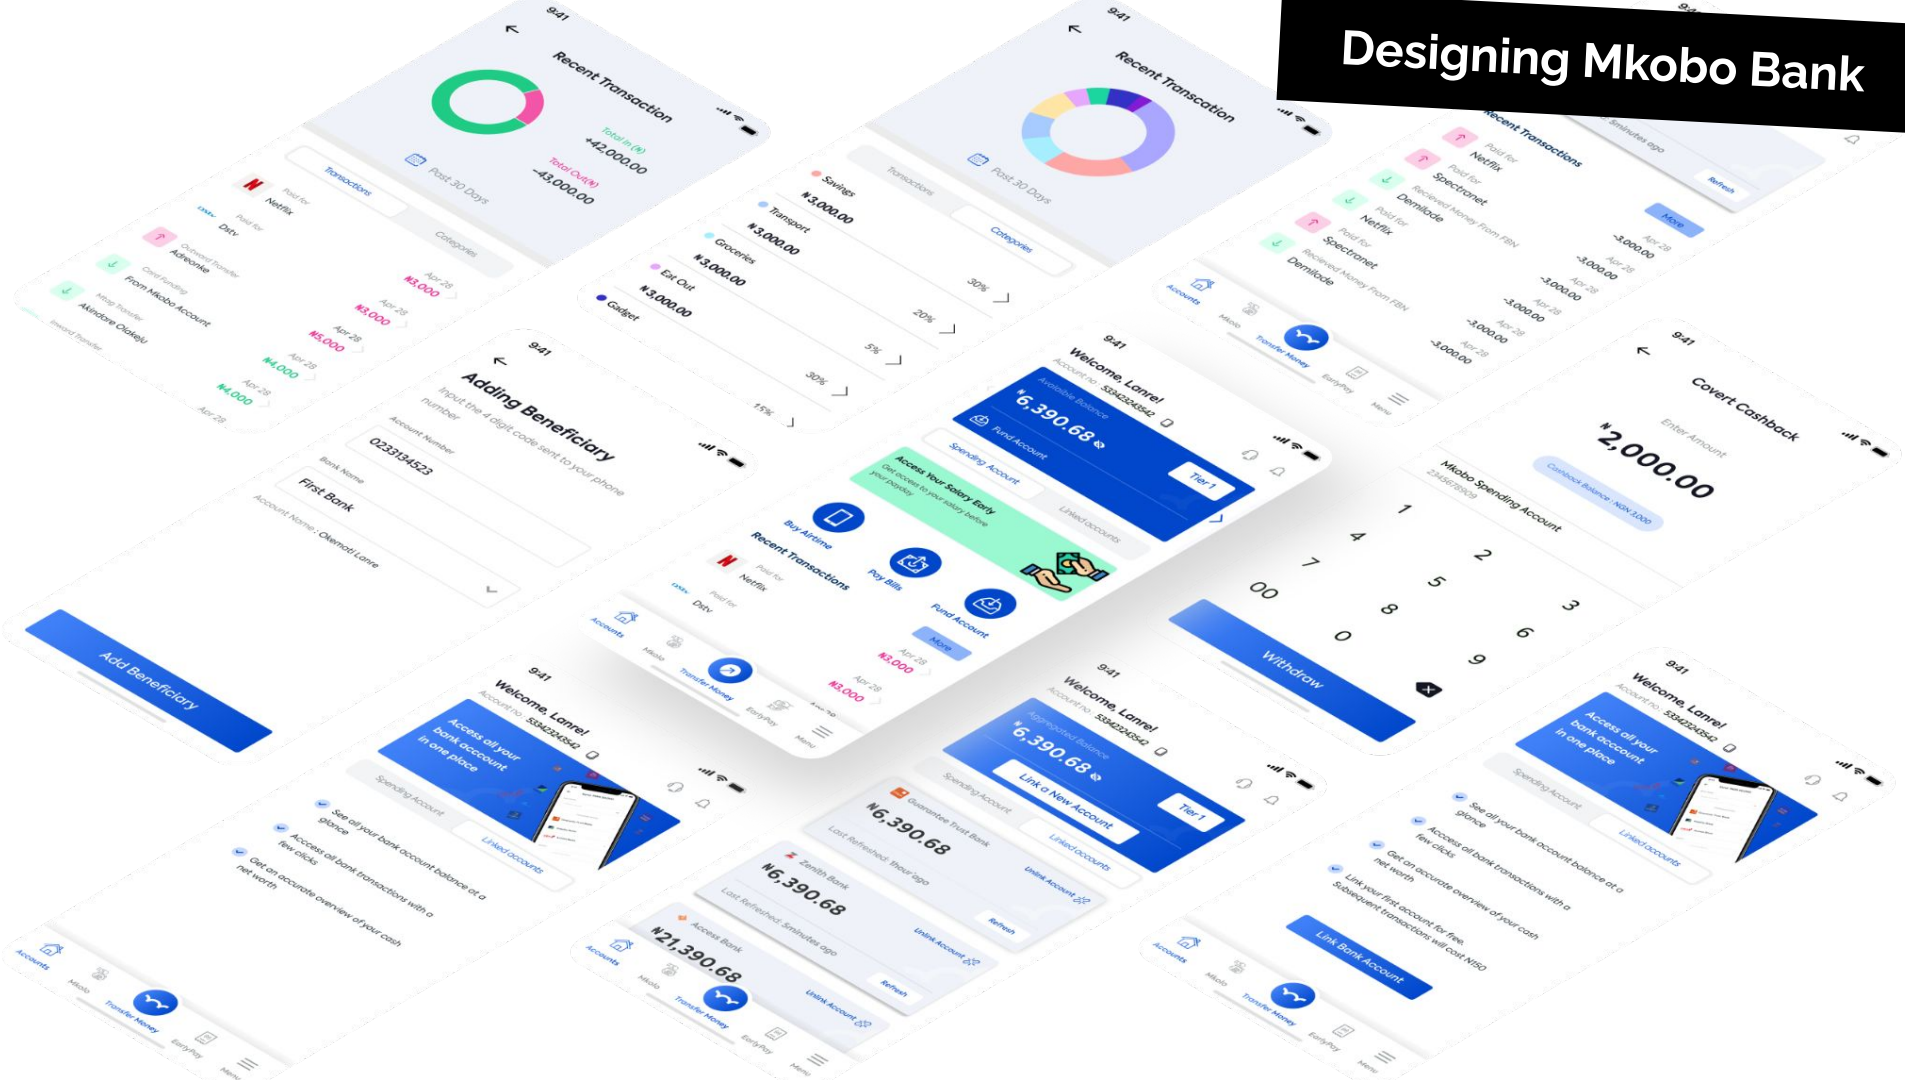

Savings | Pay Bills | Payment Links |
Request Money | Aggregated Balance

Low-Fi Designs and Journey Mapping

To get a better understanding of what we were building we created user flows for each feature to help guide design decisions which we validated and improved by using low fidelity prototypes.

Designing Mkobo Bank

After MVP Release

Users Were Dropping Off Before Value

68%

Drop Off Rate

10%

Retention

Reducing Drop-offs in Onboarding

Research Methods

- Follow-Up Calls
- Surveys
- Behavioural Data via Mixpanel

30 Customers Calls

100 Failed/Uncompleted Sign ups

76%

Dropped off at “ID Upload” Screen

Reducing Drop-offs in Onboarding

1

Key Findings

- Users noted the process was
- Overwhelming
 - Time Consuming

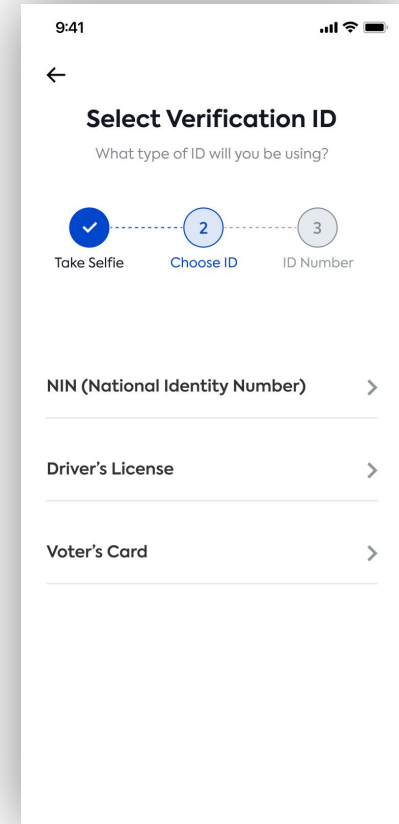

2

Core Insight

- Users wanted to **get started quickly**
- Trust needed to be **built progressively**
- Immediate value mattered more than full completion

KEY TAKEAWAY

Designing for compliance is not enough; how users *experience* compliance determines whether they stay or drop off.

Making Improvement

1. Progressive Onboarding

- Broke KYC into smaller, manageable steps
- Collected information gradually instead of upfront

2. Tiered Access System

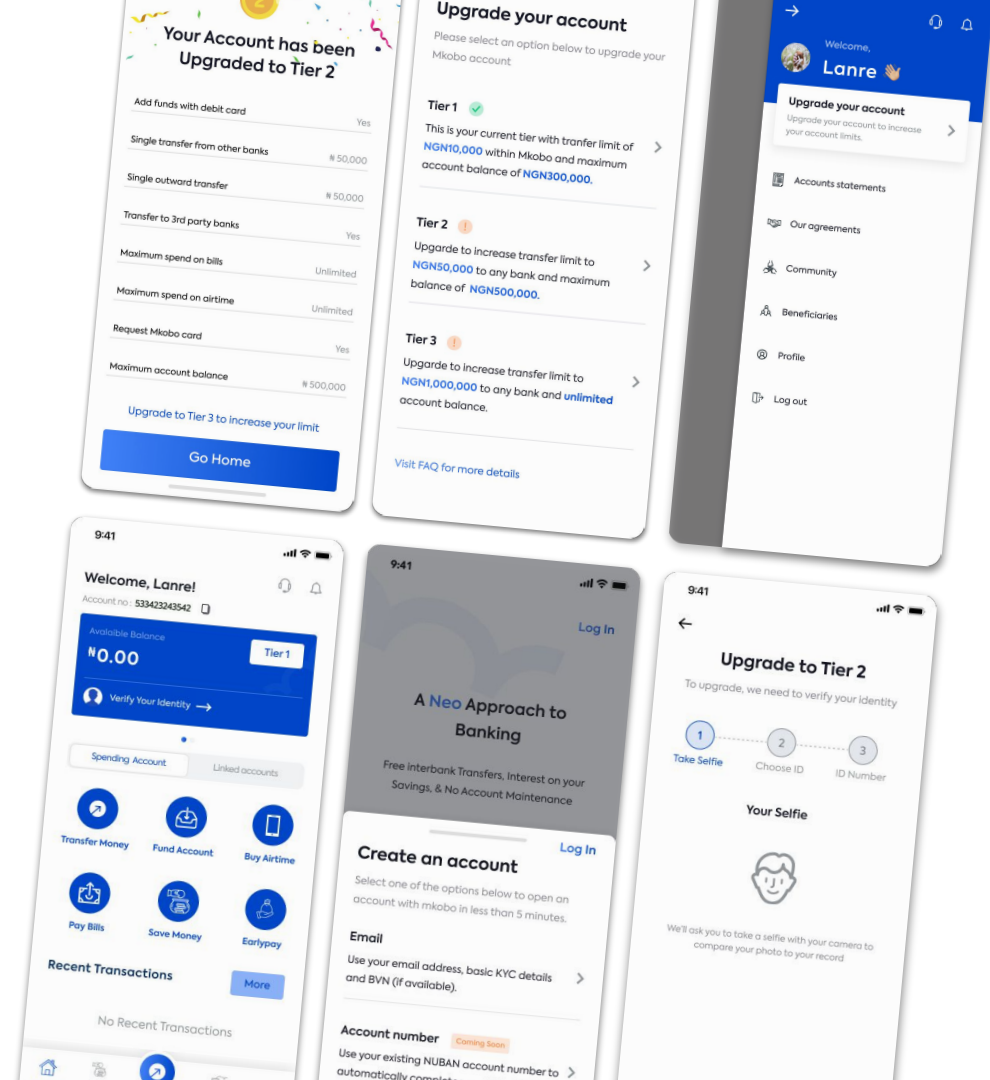

- Users could start using the app immediately
- Limited functionality unlocked early
- Higher limits unlocked as more information was provided

3. Gamified Experience

- Introduced progress indicators and milestones
- Gave users a sense of achievement at each step
- Reduced perceived effort

 Emmanuel Ake

★★★★★ 10/5/23

It is a good app★★★★★

 JaE

★★★★☆ 7/13/23

It's not a bad app when used to compare with some transfer apps... Needs some few tweaks though when logging in

 Moses Uhar

★★★★★ 10/5/23

Mkobo is very fast and good online banking easy to use good services

 Boniface Ahar

★★★★☆ 7/6/23

The process wasn't stressful but it still need to be more efficient, however it's a wonderful experience ever since

Thank You
